

Missing Number Patterns – 2s

Print out pages 2 to 8 on card. Cut out each number line and laminate.

Print out pages 9 to 13 and cut out each number and laminate. Alternatively plastic numbers, cards or other classroom resources may be used to reduce preparation time.

Students complete this activity by finding the missing number and putting it in the right place on the number line. This is a great activity for fast finishers or in maths rotation activities.
