

Numberle

Like Wordle – but numbers

Aim of the game:

Guess the hidden number in 5 guesses

How to play:

- Print out page 2 and laminate it so can be drawn on with dry erase markers. Each player gets a copy of page 2.
- Player 1 writes down any 4-digit number in the secret number box and keeps it covered so player 2 cannot see it throughout the game.
- Player 2 writes down a 4-digit number in the guess box on page 2 and says the number out loud. Remind students to say the real number. For example four thousand, eight hundred and thirty one, not 4, 8, 3, 1.
- Player 1 checks the number and circles the numbers as follows:
 - **Green circle** - correct number in the correct position
 - **Orange circle** – correct number but in the wrong position
 - **Red circle** – the number is not used in the secret number.
- Player 2 has 5 tries to correctly guess the hidden number.

Secret Number
4831

	Thousands	Hundreds	Tens	Ones
1	4	7	5	3
2	4	3	0	8
3	4	8	3	6
4	4	8	3	1
5
