

NUMBER BONDS +0 20

What You'll Need

To complete this activity, each student will need:

- The printable worksheet (we recommend printing on thick cardstock)
- One pipe cleaner
- 20 beads
- Sticky tape

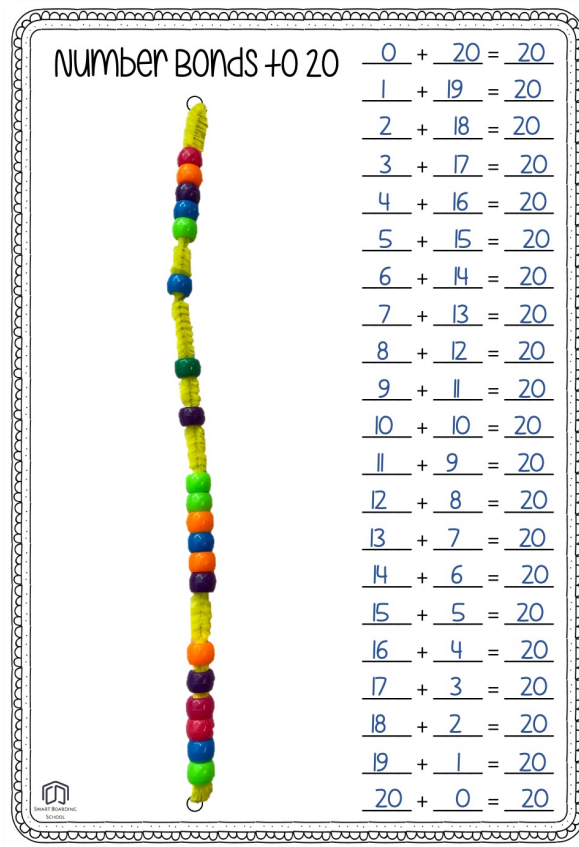

How to Set It Up

- Give each student a worksheet, a pipe cleaner, and 20 beads.
- Thread one end of the pipe cleaner through the top hole of the worksheet and secure it at the back using sticky tape. This will act as a flexible counting tool throughout the activity.

Instructions

1. Start by having students count their beads and write the number sentence $0 + 20 = 20$ on their worksheet. Then, have them add one bead to the pipe cleaner and recount the remaining beads: $1 + 19 = 20$.
2. They continue this process:
 - Add a bead
 - Count the remaining beads
 - Write the matching number sentence

This continues until all 20 beads are on the pipe cleaner, and students have recorded all the number bonds to 20.

Number Bonds to 20
